075 997 5503

BENEFITS

- Vigor indices to assess crops development and health
- Water stress indices to identify areas with water requirement
- Chlorophyll indices to identify problematic areas with choloris
- Geolocated crop scouting to simplify the work on field

Features

FIELD MAPPING

Geolocate the field on the map and draw it. Features will be immediately hooked.

SATELLITE IMAGERY

Consult satellite images of the field with vigor, water stress, and chlorophyll indices.

CROP SCOUTING

Geolocate and register data from crop scouting by using the mobile App: pest and disease, crop damages, phenology, traps and catches.

APP MOBILE

Use the App to consult quickly all the data on your field and carry out the crop scouting.

WEATHER FORECASTS

Check professional weather forecasts up to 5 days updated every 3 hours: temperature, humidity, windspeed, rainfall.

ISSUES

Register general problems of the farm and different types of crop damages (abiotic, insects) that need to be solved.

CROP OPERATIONS

Register where, how and when crop operations such as irrigation, treatments and fertilisation have been carried out.

TASK MANAGEMENT

Create and assign tasks to be done in the farms to your collaborator in real time.
