

Increase the quality and quantity of cultivated tobacco

Reduce management costs

## Grow TOBACCO and enhance **SUSTAINABILITY**

Prevent the spread of stress and diseases

Reduce the use of water

Monitor the field, also remotely

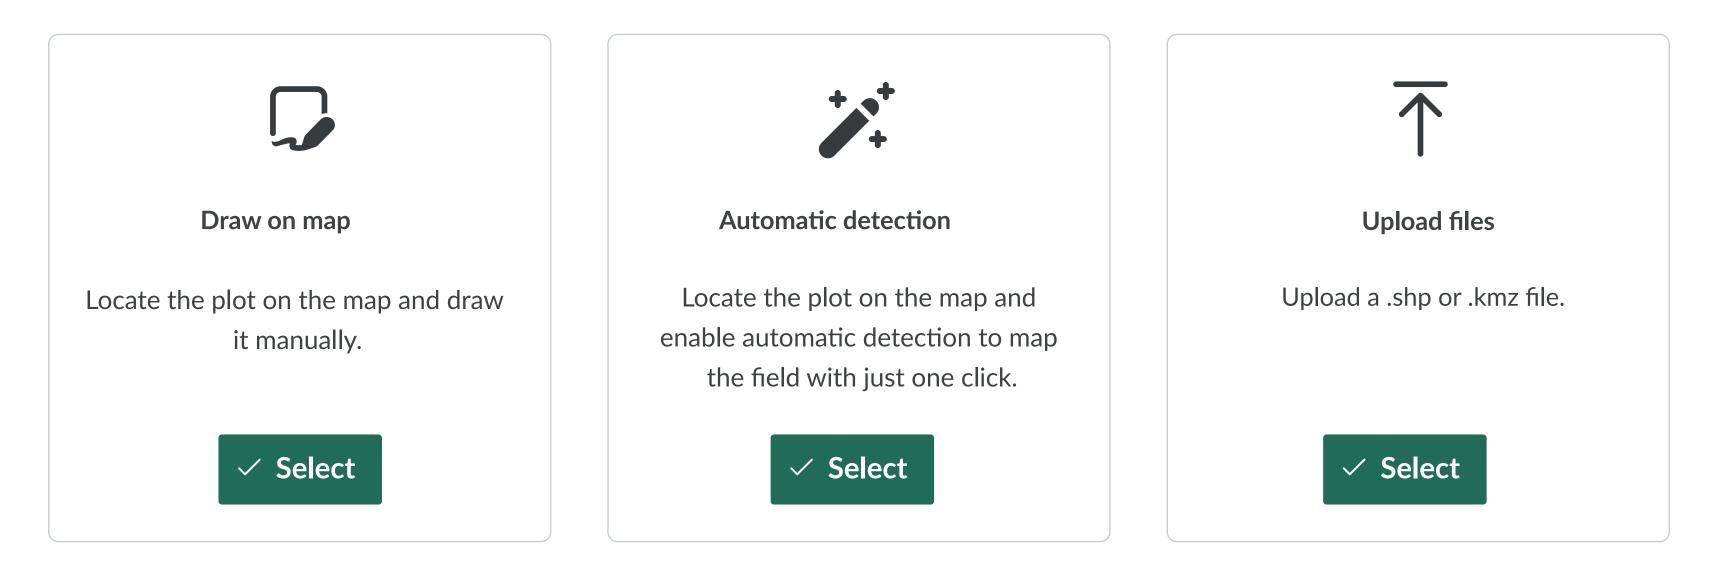

### FIELD MAPPING

### Geolocate the field on the map and draw it. Features will be immediately hooked. You can enable the cadastral map and enter sheet and parcel information.

Use one of the following methods to create your field.

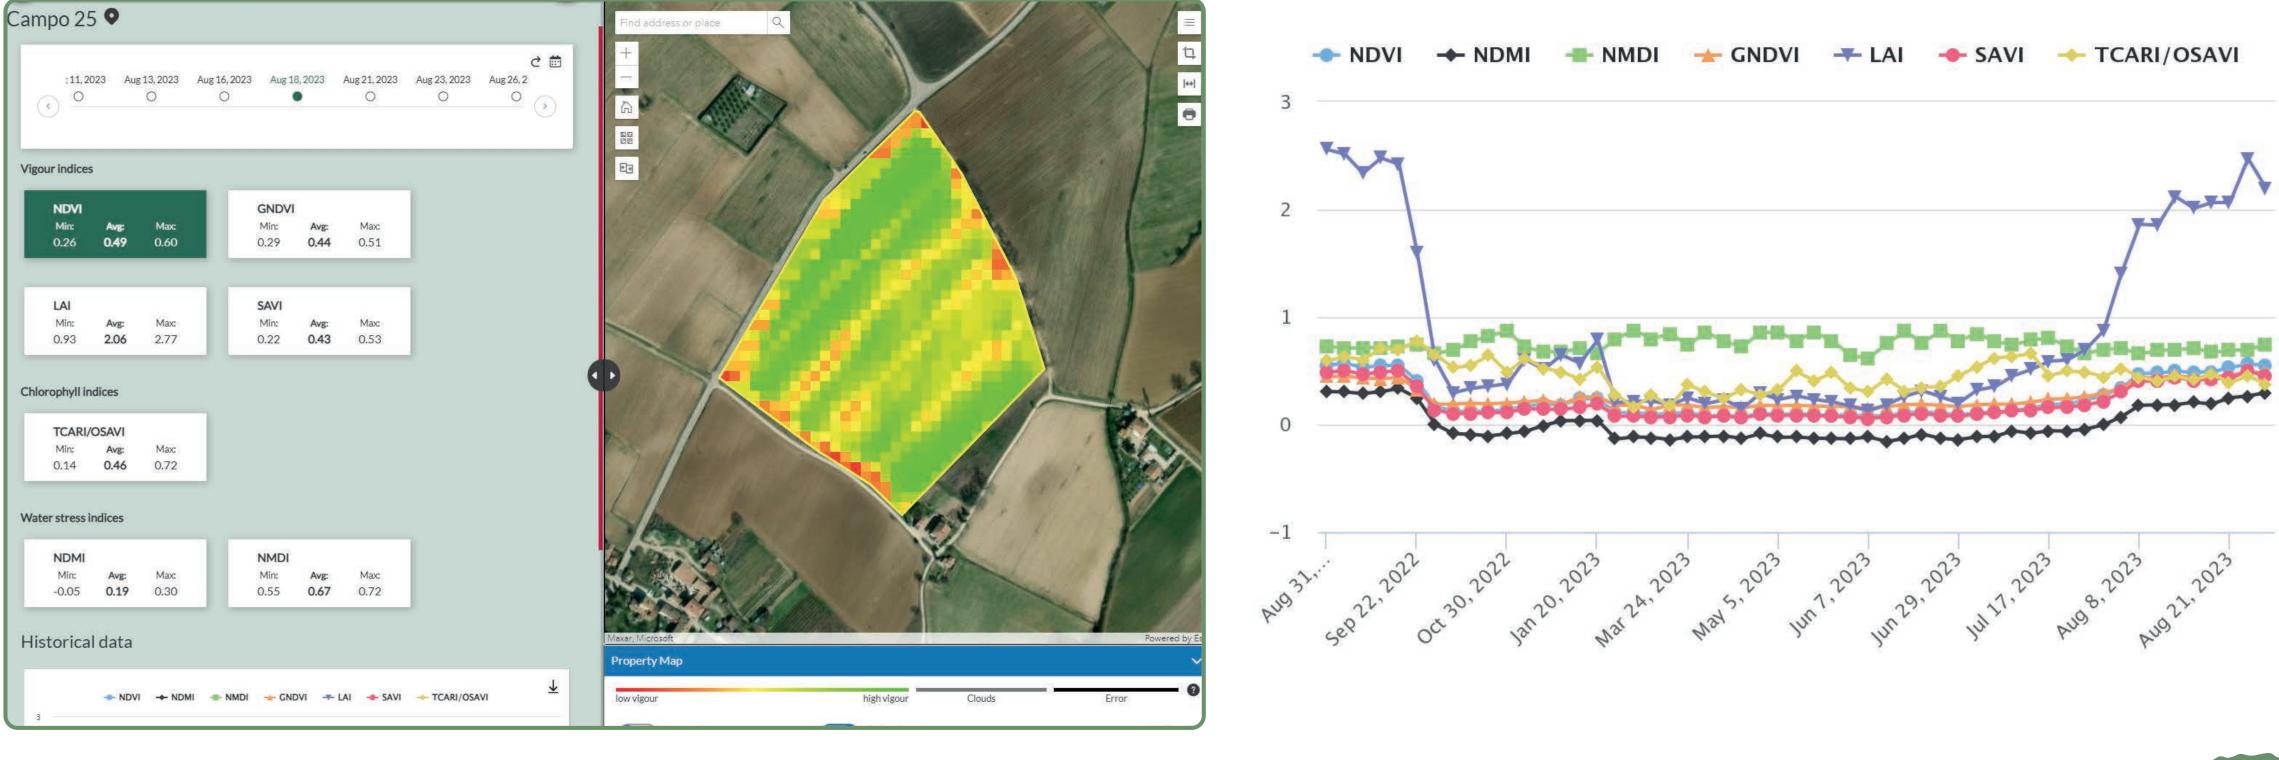

## SATELLITE IMAGERY

indices to assess the health of the crop and plan monitoring activities.

## Consult Sentinel-2 satellite images with vigor, water stress and chlorophyll

### y l PHENOLOGY

Prediction of phenology to assess field needs in each development stage.

### **A** IRRIGATION

Evaluation of water requirements to carry out irrigation when necessary with the right amount of water.

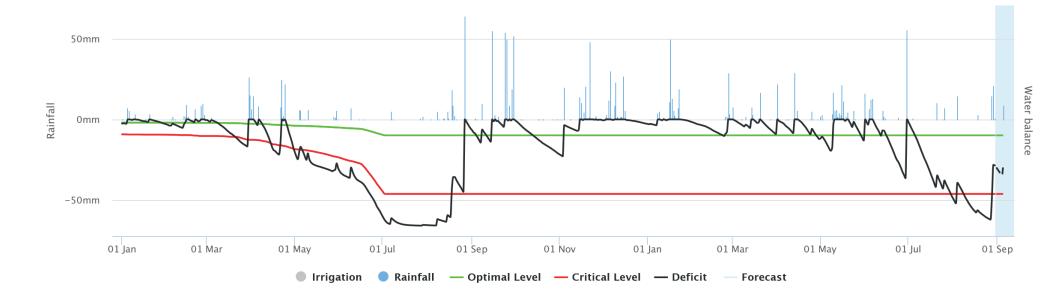

### FERTILIZATION $(\mathbf{Y})$

Calculation of the total nitrogen, phosphorus and potassium needs (Kg/ha) required by the crop in order to obtain important suggestions on the doses of fertilizer to be applied.

Tobacco phenology

Irrigation

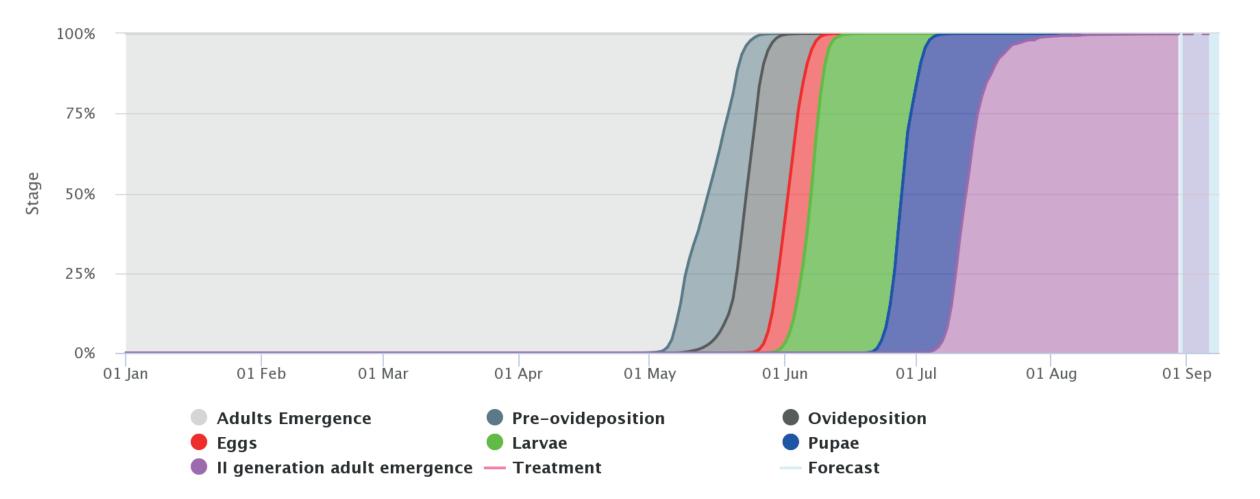

P2O5 per ha

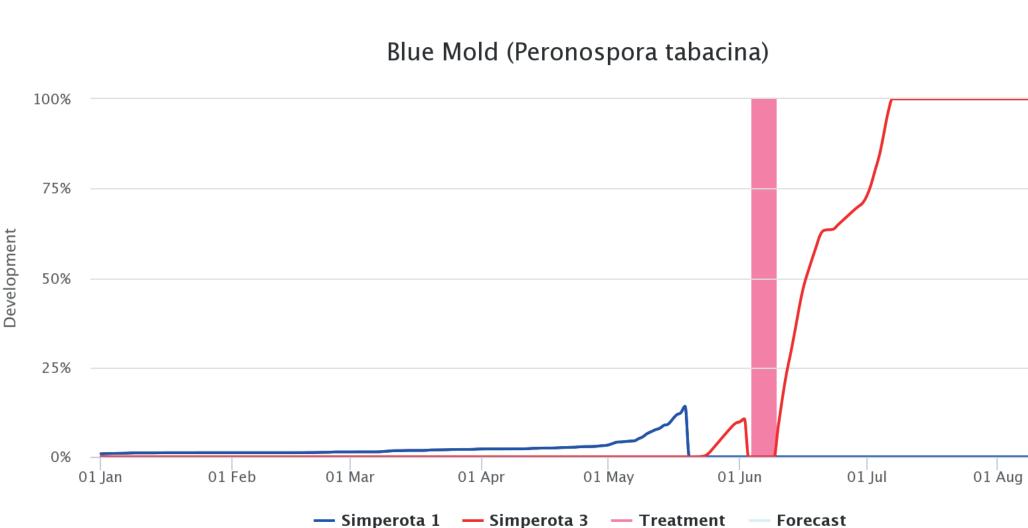

### FEATURES

### Cotton bollworm (Helicoverpa armigera)

01 Sep

### **PHYTOPATHIES AND INSECTS MODEL**

Prediction of infestations and diseases to assess the risk of pest (Helicoverpa armigera) and diseases (Peronospora) and act promptly. The defense forecast models interact with the registered treatments.

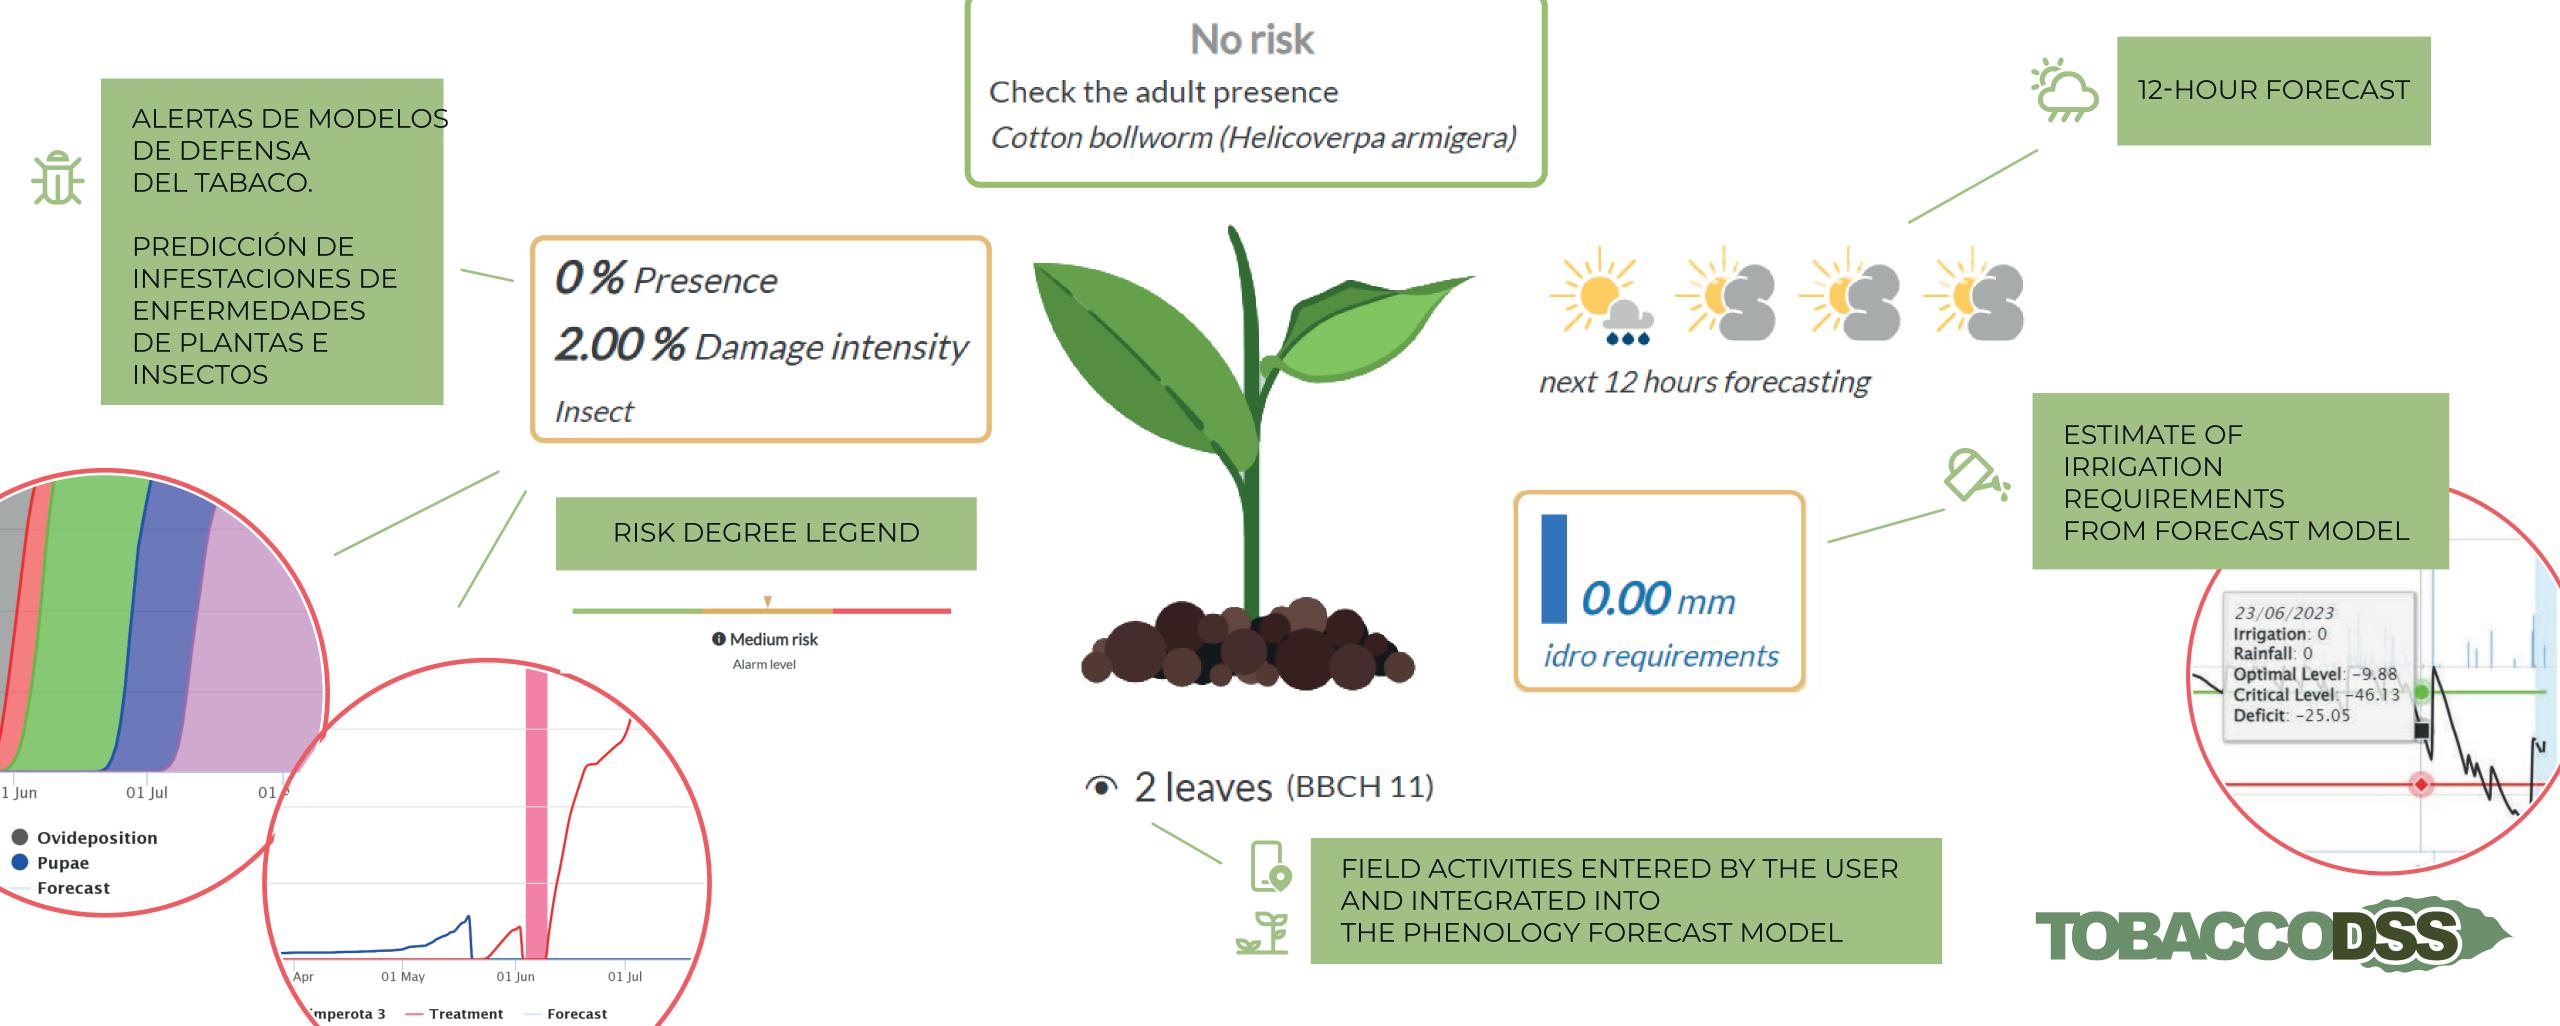

### **DECISION SUPPORT**

### Suggest operations to be carried out based on collected data.

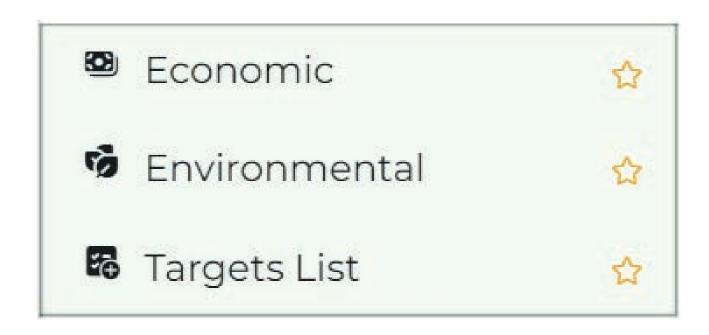

## Monitor the **economic** (yield, production) and **environmental** (water consumption, input control and farm biodiversity) **sustainability indicators** of your farm. You can set the level to be reached for each indicator and monitor how the work is going.

ENVIRONMENTAL INDICATORS	ENVIRONMENTAL 🕐			
ironmental indicators focus on the impac	ct of agricultural practices on the surr	ounding environm	ent	
Water				
Indicator	Value	Target	Status	
Total water consumption	20899.38 m <sup>3</sup>	Less than 459781.50m <sup>3</sup>	$\odot$	$\sim$
Average water consumption	7404.53 m <sup>3</sup> /ha	Less than 7500.00m <sup>3</sup> /ha	$\odot$	$\sim$
Water use efficiency	0 m <sup>3</sup> /t

### **PRESCRIPTION MAPS**

Choose the most suitable vegetation index to draw up the prescription map and carry out a variable rate fertilization.

### WORK

### TASK MANAGEMENT

Create and assign tasks to be done in the farms to your collaborator in real time.

### MACHINERY

Register your agricultural machinery, any problems and maintenance carried out. You can also connect them to Agricolus by using Agrirouter.

### **CROP OPERATIONS**

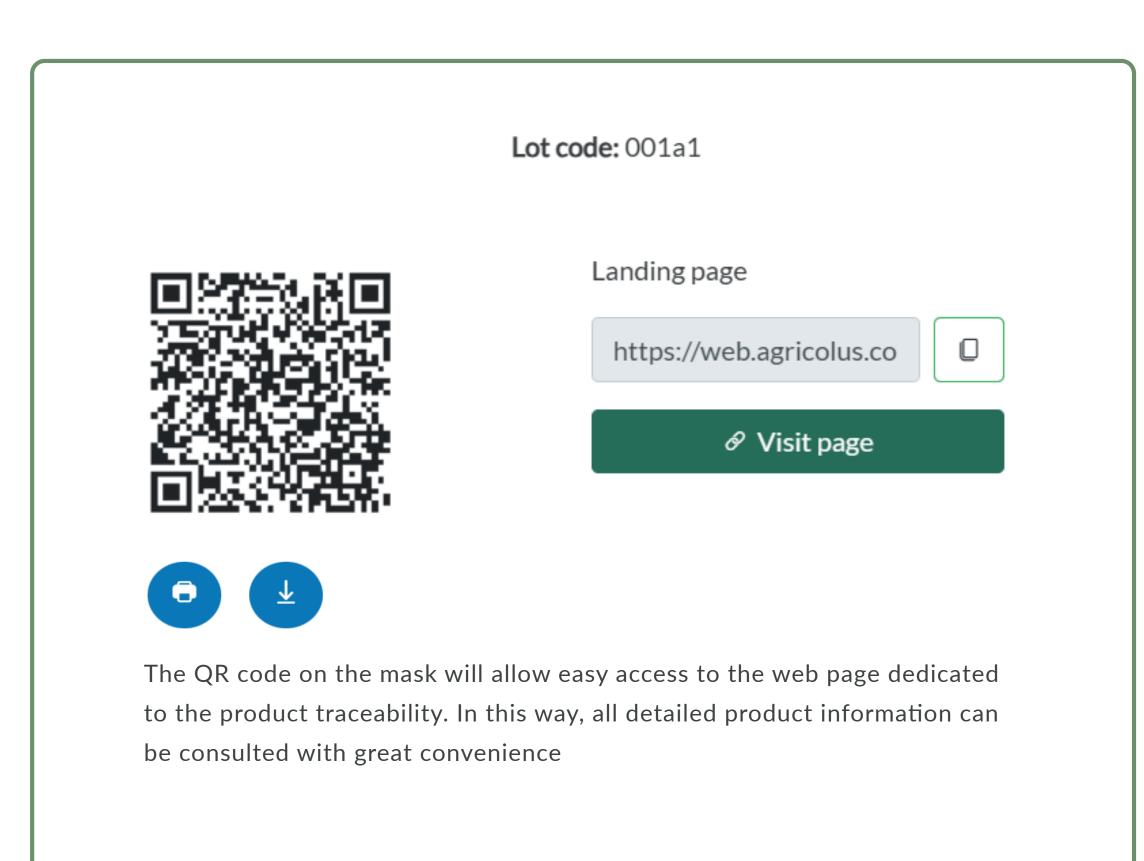

**|\***-|

Register where, how and when crop operations (treatments, fertilization, pruning, harvest) have been carried out. You can also access phytosanitary products database.

# PRODUCTION LOTS

Create and assign to each crop its own production lot to improve **traceability** of operations. A **QR code** is also generated that allows you to access and share the dedicated web page where you can consult all the information on the product.

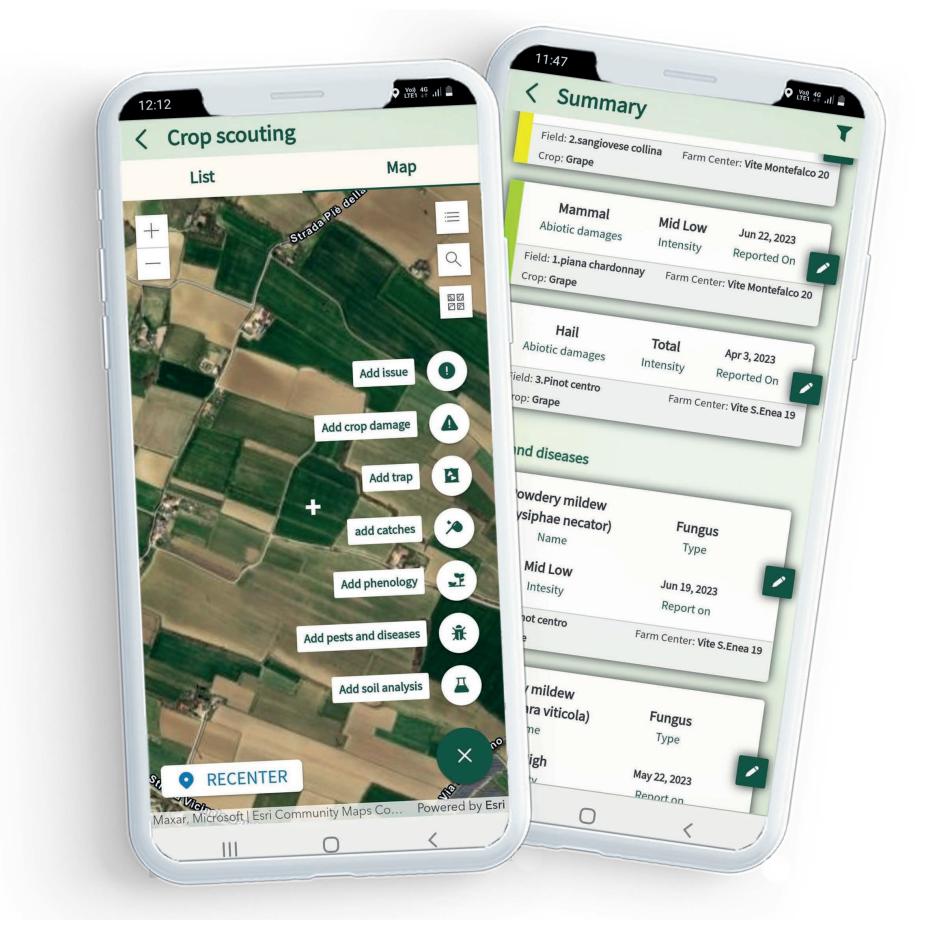

### **CROP SCOUTING**

Geolocate and register data from crop scouting by using the mobile App for phytosanitary monitoring and evaluation of crop development.
