

# DEFENSE and MONITORING for TOMATO

FORECAST  
MODELS

CROP  
OPERATIONS

**TOMATO**DSS

POWERED BY  
AGRICOLUS

PRESCRIPTION  
MAPS

SATELLITE  
IMAGERY

CROP  
SCOUTING

 Increase yield and  
quality of tomato

 Reduce  
management cost

 Prevent the spread of  
stress and diseases

 Optimize the  
use of water

 Monitor crops health,  
even remotely

## FIELD MAPPING

Geolocate the field on the map and draw it. Features will be immediately hooked. You can enable the cadastral map and enter sheet and parcel information.

Use one of the following methods to create your field.

### Draw on map

Locate the plot on the map and draw it manually.

✓ Select

### Automatic detection

Locate the plot on the map and enable automatic detection to map the field with just one click.

✓ Select

### Upload files

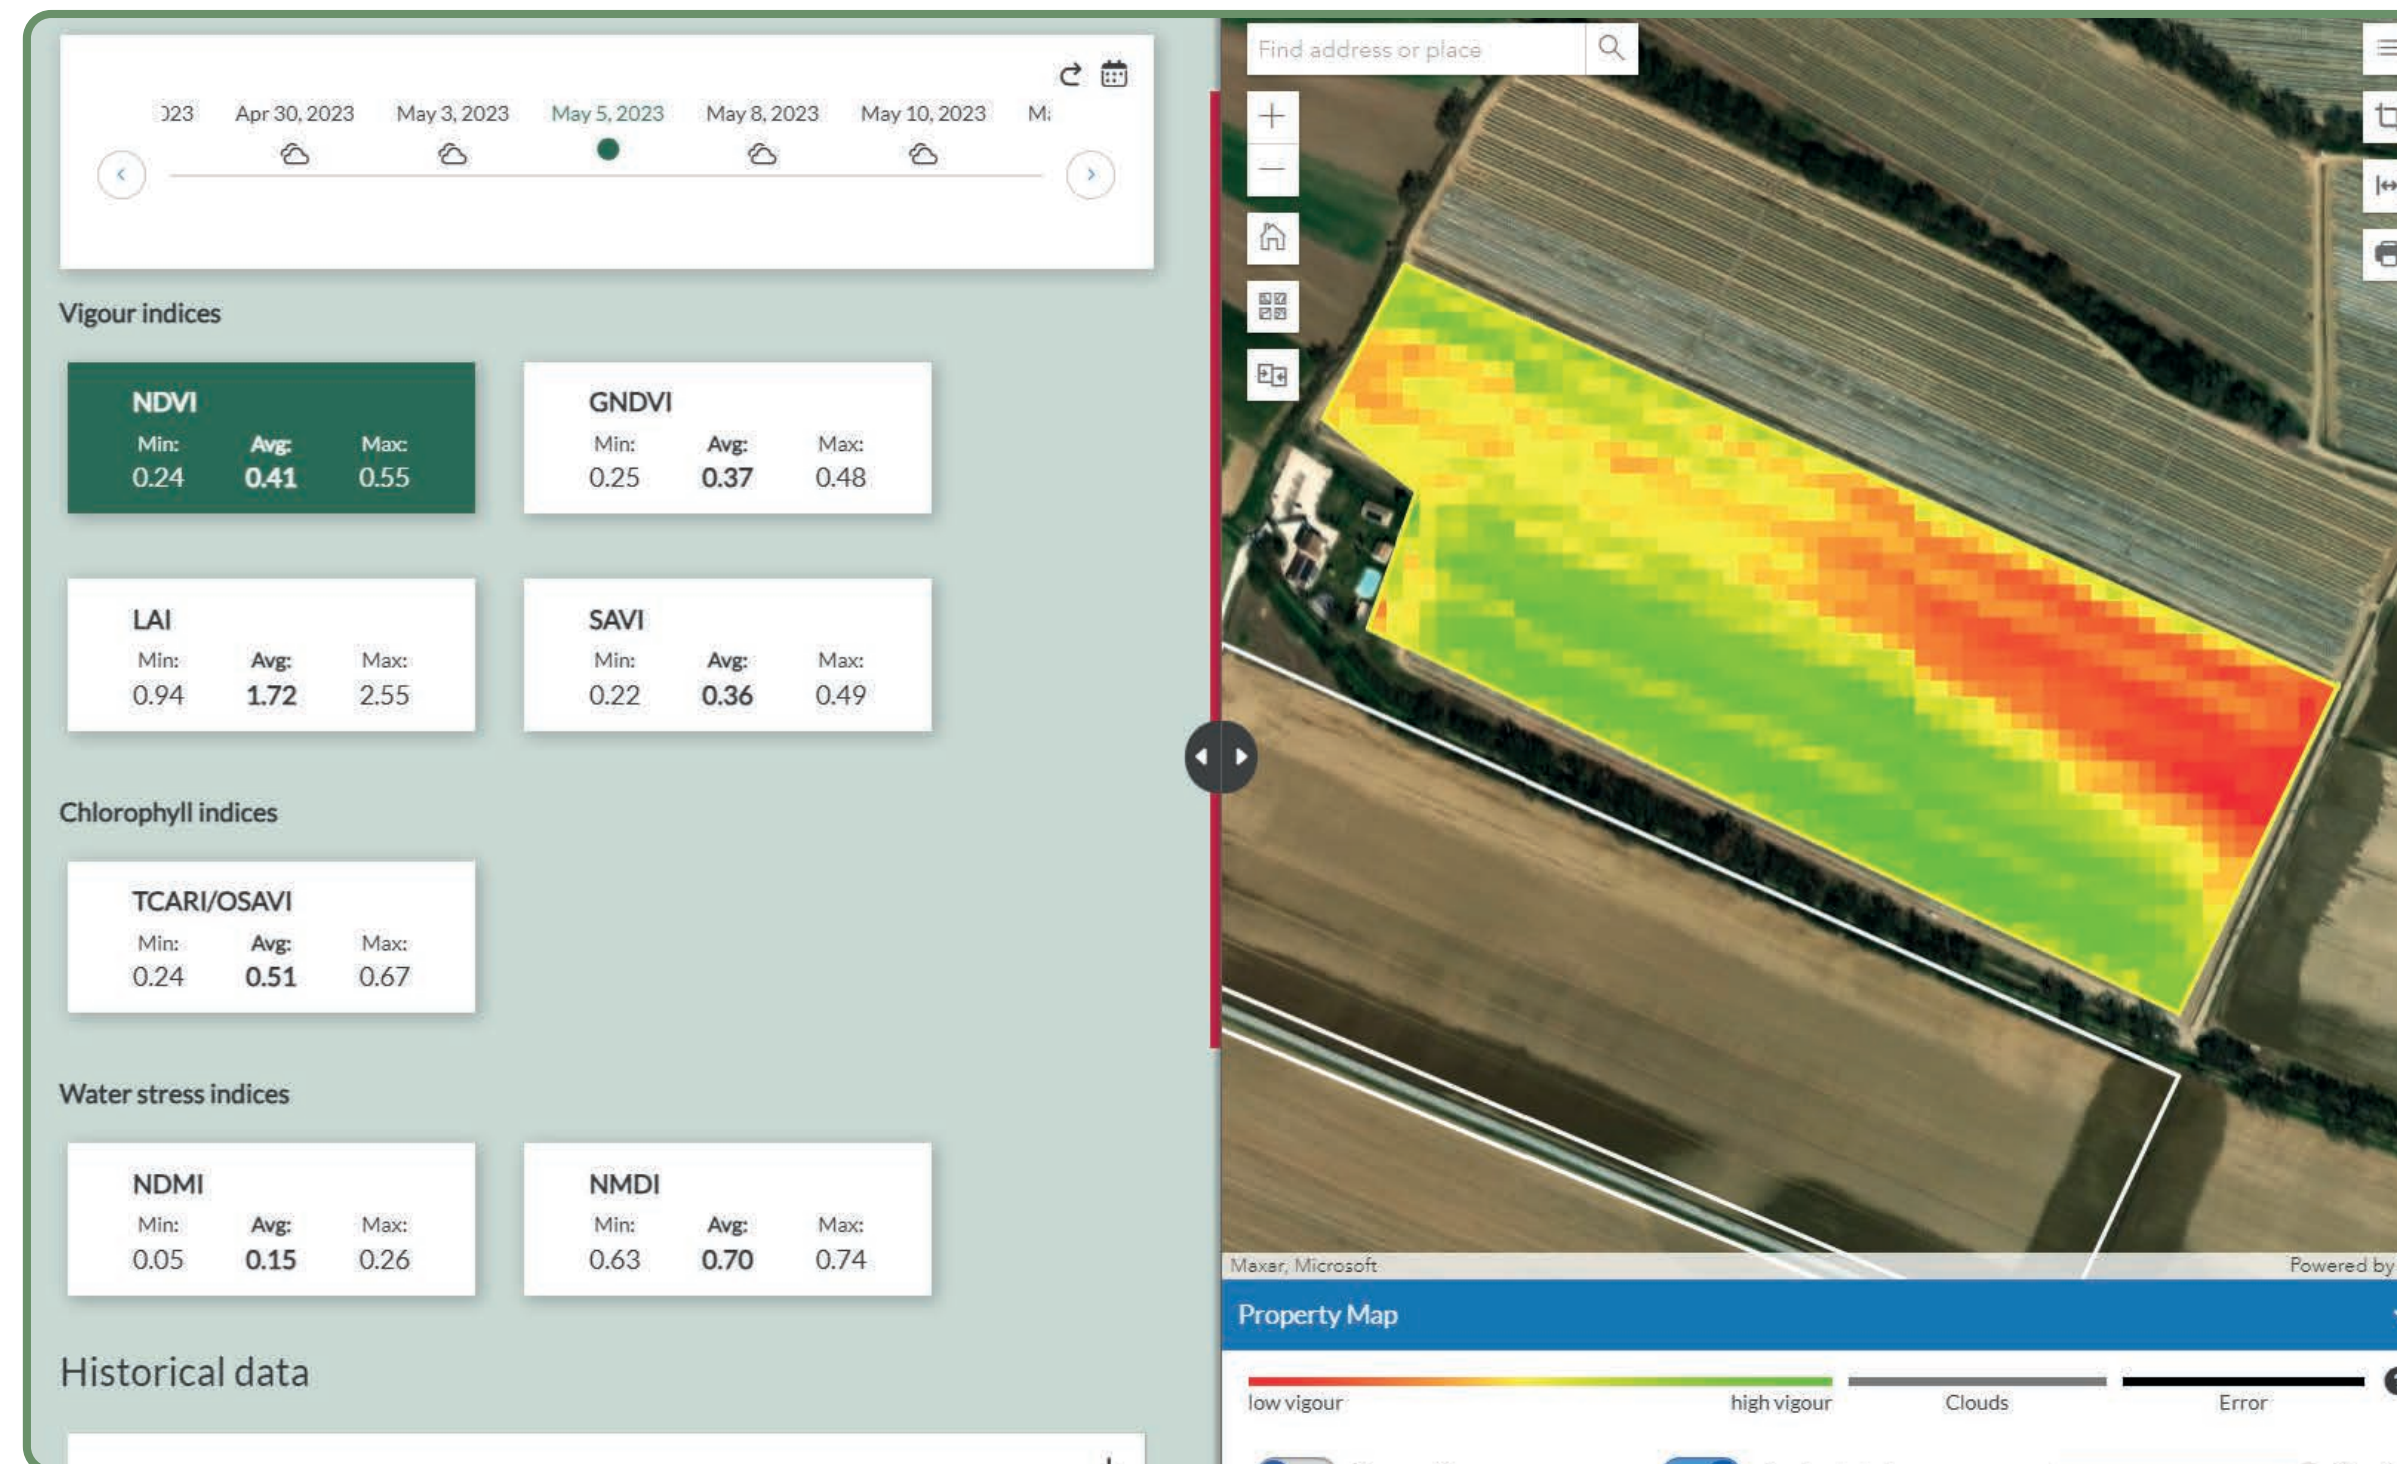

Upload a .shp or .kmz file.

✓ Select

## SATELLITE IMAGERY

Consult Sentinel-2 satellite images with vigor, water stress and chlorophyll indices to assess the health of the crop and plan monitoring activities.

# FEATURES

## FORECAST MODELS

### PHENOLOGY

Prediction of phenology to assess field needs in each development stage.

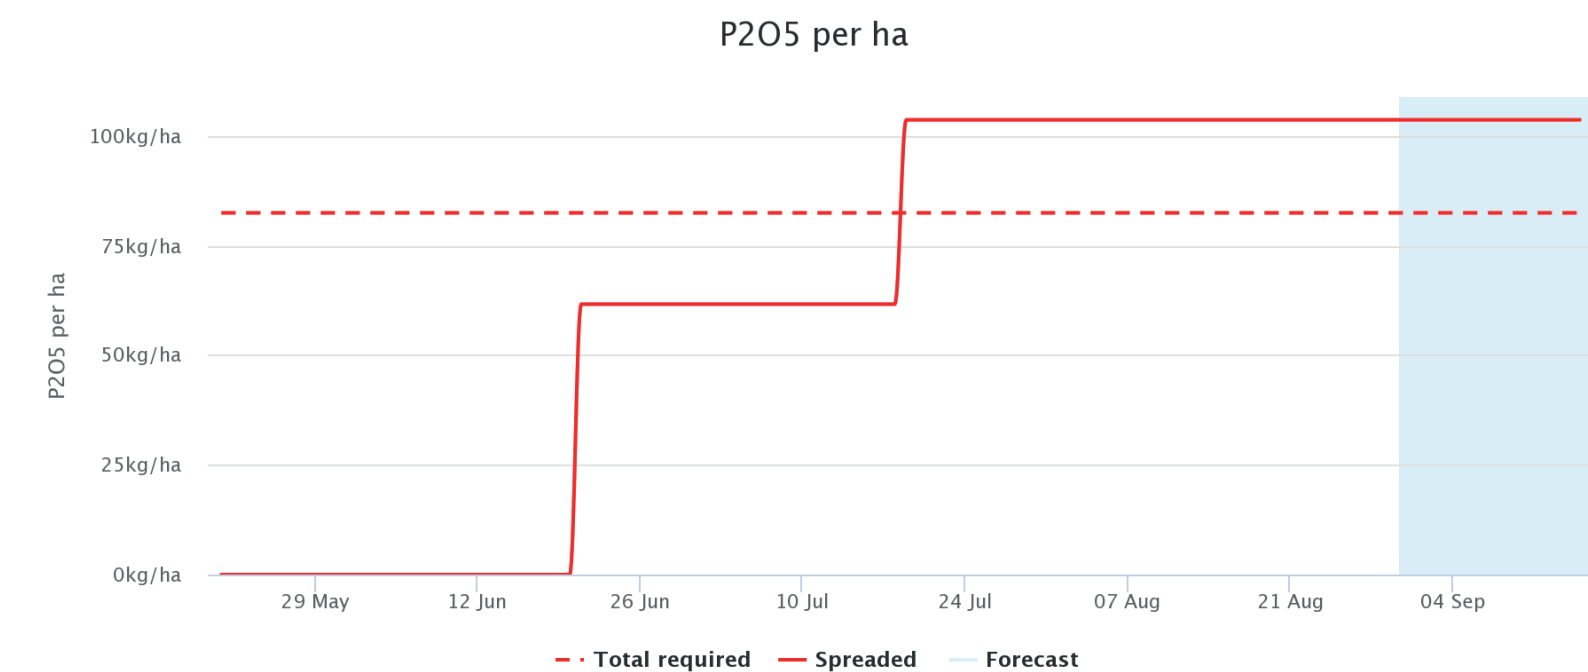

### IRRIGATION

Evaluation of water requirements to carry out irrigation when necessary with the right amount of water.

### FERTILIZATION

Calculation of the total nitrogen, phosphorus and potassium needs (Kg/ha) required by the crop in order to obtain important suggestions on the doses of fertilizer to be applied.

# FEATURES

## PHYTOPATHIES AND INSECTS MODEL

Prediction of the risk of phytopathies (**Tomato Downy mildew**) and pests (**Tuta absoluta** and **Helicoverpa armigera**) in order to carry out an effective defense. The defense forecast models interact with the registered treatments.

# FEATURES

## DECISION SUPPORT

Suggest operations to be carried out based on collected data.

**0% Presence**  
**55.00% Damage intensity**  
Fungus

**100% Presence**  
**18.00% Damage intensity**  
Insect

**No risk**  
Tomato downy mildew

**100% Presence**  
**57.00% Damage intensity**  
Bacterium

**No risk**  
Tomato Leaf Miner (*Tuta absoluta*)

**No risk**  
Cotton bollworm (*Helicoverpa armigera*)

FIELD ACTIVITIES ENTERED BY THE USER AND INTEGRATED INTO THE PHENOLOGY FORECAST MODEL

## SUSTAINABILITY

Monitor the **economic** (yield, production) and **environmental** (water consumption, input control and farm biodiversity) **sustainability indicators** of your farm. You can set the level to be reached for each indicator and monitor how the work is going.

ENVIRONMENTAL INDICATORS ENVIRONMENTAL ?

Environmental indicators focus on the impact of agricultural practices on the surrounding environment

### Water

Indicator	Value	Target	Status
Total water consumption	20899.38 m <sup>3</sup>	Less than 459781.50m <sup>3</sup>	✓
Average water consumption	7404.53 m <sup>3</sup> /ha	Less than 7500.00m <sup>3</sup> /ha	✓
Water use efficiency	0 m <sup>3</sup> /t		

# FEATURES

The screenshot displays the TOMATO DSS interface for creating a prescription map. On the left, a control panel includes a date range from August 31, 2022, to September 15, 2022. The fertilizer selected is NOVA SOP 0-0-52 (52% nutrient). The number of zones is set to 4, and the calculation mode is 'Min - Max'. Nutrient levels are set from 80 to 150 kg/ha. A table summarizes the zones, and summary statistics for the total fertilizer, area, and average nutrient are provided at the bottom.

Zones	Area	Avg nutrient
Zone -1	2.65 ha	80 kg/ha
Zone 0	9.27 ha	103 kg/ha
Zone 1	0.76 ha	127 kg/ha
Zone 2	0.71 ha	150 kg/ha

Total fertilizer	2633.85	kg
Total area	13.39	ha
Avg nutrient	102.29	kg/ha

The right side of the interface shows an aerial map of a field with a prescription map overlaid. The map is color-coded by nutrient zones, with a color scale from purple (low) to red (high). An inset map shows the field's location within a larger context.

## PRESCRIPTION MAPS

Choose the most suitable vegetation index to draw up the prescription map and carry out a variable rate fertilization.

# FEATURES

## WORK

### TASK MANAGEMENT

Create and assign tasks to be done in the farms to your collaborator in real time.

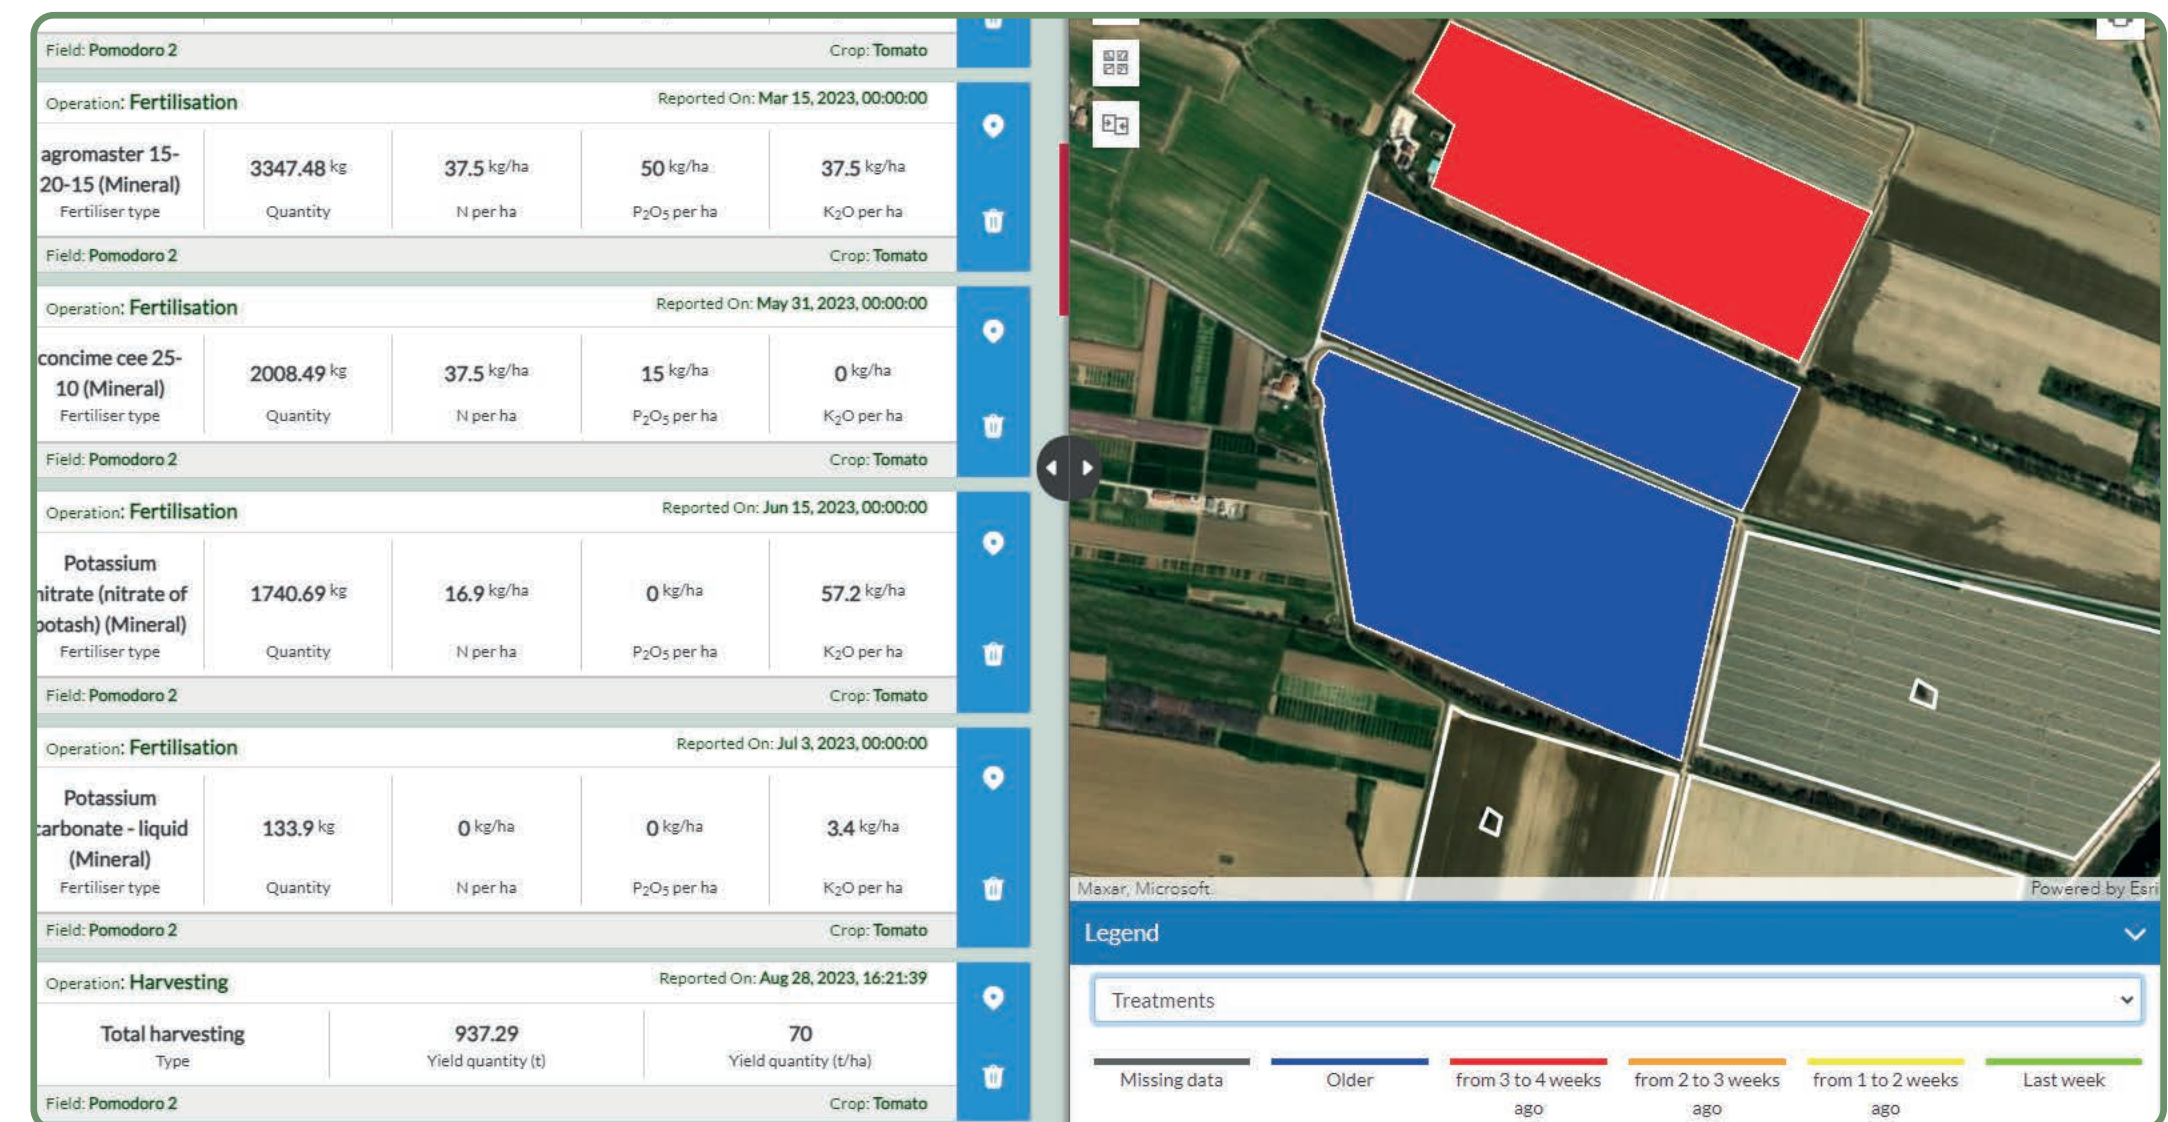

### MACHINERY

Register your agricultural machinery, any problems and maintenance carried out. You can also connect them to Agricolus by using Agrirouter.

### CROP OPERATIONS

Register where, how and when crop operations (treatments, fertilization, pruning, harvest) have been carried out. You can also access phytosanitary products database.

Lot code: 001a1

Landing page

<https://web.agricolus.co>

Visit page

The QR code on the mask will allow easy access to the web page dedicated to the product traceability. In this way, all detailed product information can be consulted with great convenience

## PRODUCTION LOTS

Create and assign to each crop its own production lot to improve **traceability** of operations. A **QR code** is also generated that allows you to access and share the dedicated web page where you can consult all the information on the product.

## CROP SCOUTING

Geolocate and register data from crop scouting by using the **mobile App** for phytosanitary monitoring and evaluation of crop development.

## WEATHER

### WEATHER FORECASTS

Consult professional weather forecasts up to 7 days updated every hour: temperature, humidity, wind speed, rainfall.

### WEATHER STATIONS

Virtual weather station included; physical weather stations and sensors can be purchased or integrated, if already present in the company.

30 Aug 09:00

**Temperature** : 18.24 °C

**Temperature (Min-Max)** : 16.72 / 20 °C

**Precipitation** : 0 mm

**Cumulative precipitation (30 Aug 00:00–30 Aug 23:59)** : 0.60 mm

**Leaf wetness** : 60 min

**Relative humidity** : 89.81 %

**Relative humidity** : 81.04 / 96.3 %

**Wind speed** : 0.3 m/s

**Wind speed (Min - Max)** : 0.3 / 0.8 m/s
